

Veefil-RT On Display At EKKA, BRISBANE

September 24, 2018

Tritium's Veefil-RT was on display at the Department of Transport and Main Roads Ekka 2018 stand this year from 10-19 August, 2018.

"The event was a huge success with over 5000 individual public interactions. The display charger presented an opportunity to increase the public's awareness of the technology and it also allowed the Department to show a real-life version of the Queensland Electric Super Highway." **Queensland Department of Transport and Main Roads**
